Sil-Pak

This silicone material is for use in combination with pads to cushion and protect the foot. The liquid formula fills all void areas and prevents dirt from penetrating. In this way the sole stays clean and unpleasant odours will disappear.

Features

- Silicone material
- Liquid padding material
- Shock-absorbing, protective and supportive

Specifications

- Hardness: 30 shore
- Set time: 1-2 min.
- Color: purple

SIL-PAK - 210 CC

748-0001-094

Sil-Pak SOFT

Vettec Sil-Pak SOFT has all the properties of Sil-Pak, but has a shore hardness of 15. Ideal for horses that need a slightly softer approach. Sil-Pak Soft is developed for use in combination with pads to seal, protect and support the horse's hoof.

Features

- Silicone material
- Liquid padding material
- Shock-absorbing, protective and supportive

Specifications

- Hardness: 15 shore
- Set time: 2 min.
- Color: camel

SIL-PAK SOFT - 210 CC

748-0001-096

Equi-Pak

Vettec Equi-Pak protects, cushions and supports. It is great to use for laminitic cases. Vettec Equi-Pak bonds to sole and frog and can be applied in a thin protective layer or towards ground level for full support.

Features

- Protective, soft padding material
- Great for a tilted hoof bone or laminitis
- Adheres to sole & frog
- A pad is not necessary

Specifications

- Hardness: 55 shore
- Set time: 30 sec.
- Color: clear

EQUI-PAK - 210 CC

748-0001-099

Equi-Pak SOFT

Vettec Equi-Pak SOFT is a softer pad material. It can be used on horses with thin soles and low bone joints. Equi-Pak SOFT is great for therapeutic cases and is designed for use in combination with pads.

Features

- Extra soft padding material
- Very suitable for therapeutic use
- Developed for use in combination with pads

Specifications

- Hardness: 45 shore
- Set time: 40 sec.
- Color: clear

EQUI-PAK SOFT - 210 CC

748-0001-101

Equi-Pak CS

Equi-Pak CS is ideal for the prevention and treatment of thrush and provides protection, support to the hoof and bone system. Equi-Pak with Copper Sulphate seals out moisture and dirt, eliminating thrush and the need for daily hoof cleaning.

Features

- Treats most cases of thrush
- Provides durable, shock-absorbing support
- Use as a preventive measure before thrush starts
- A pad is not necessary

Specifications

- Hardness: 55 shore
- Set time: 1 min.
- Color: green

EQUI-PAK CS - 210 CC

748-0001-100

Vettec Sole-Guard

Vettec Sole-Guard gives an effective support for the bare footed horse. It sets firm to protect, but retains the flexibility to move naturally with the foot. Vettec Sole-Guard provides protection and support for the bottom of the hoof in one easy application.

Features

- Quick and effective protection and support for a horse with healthy, unshod hooves
- A hard yet flexible protection that moves naturally with the foot

Specifications

- Hardness: 65 shore
- Set time: 30 sec.
- Color: black

SOLE GUARD - 210 CC

748-0001-102

Vettec SuperFast

Vettec SuperFast is ideal for foal extensions and making custom shoes. This product helps building heels, correcting heel angles, and medial/lateral extensions. Good for small hoof repairs

Features

- Ideal for foal adhesive shoes & applying custom support
- Great for raising the heels, correcting the angle of the heels & making medial/lateral extensions
- Also excellent for minor hoof repairs

Specifications

- Set time: 30 sec.
- Loadable: 2-3 min.
- Color: clear

EQUI-THANE SUPERFAST - 210 CC

748-0002-088

Vettec Adhere

Vettec Adhere can be used for small and large hoof wall repairs and for gluing on shoes. It bonds to plastic, steel and aluminum. Vettec Adhere is excellent for urethane glue-on shoes and boots. It flexes like the hoof wall and can be nailed.

Features

- Ideal to glue on shoes & applying custom support
- Also excellent for minor hoof repairs

Specifications

- Set time: 1 min.
- Weight bearing: 4-5 min.
- Full cure: 6 min.
- Color: black

Claw Check

The Vettec Bovi-Bond claw check is a real must have in the toolbox of every hoof trimmer, dairy farmer and vet. The tool allows an easy and objective check to ensure the correct hoof angle and balance during hoof trimming.

Features

- Handle for working comfort
- Easy to clean
- Control point angle (up to 49°) between the sole and front claw
- Measuring point for length between crown edge and toe = 90 mm
- Checks sole flatness
- Visual rib check

Vettec Bovi-Bond Apron

The Vettec Bovi-Bond apron is specially designed for claw trimmers and dairy farmers to work comfortably and clean. The PVC apron protects clothing and has handy pockets to safely store knives while working. In addition, the design is such that the V-neck and flexible PVC ensure ease of movement while working. Easy to clean after use.

Features

- Made of durable flexible PVC
- V-neck for ease of movement
- Build-in blade pockets with cleaning ring
- Available with and without leg buckles
- Easy and quick to clean
- Adjustable straps and double stitched seams

LET'S BOND

HOW TO USE

Clean the hoof with a grinder or a hoof knife

Dry the hoof and the hoof block with a heat gun

Open the cartridge by turning the cap counterclockwise

Attach the mixing tip and place the cartridge in the dispenser

Dispense material to ensure both sides are flowing

Apply Bovi-Bond on the hoof block

Place the hoof block on the hoof

Hold the block for 30 seconds

Weight bearing after 2-3 minutes

For best results, use Bovi-Bond between 15°C and 25°C

BUILDING BLOCKS OF SUCCESS
