LIBERTY

Why Liberty horseshoe nails – Benefits for the farrier and the horse:

The innovative production process is unique to Liberty horseshoe nails. Liberty nails are always very smooth and sharp and featuring fine details, such as beveled sides and sharper point. This makes nailing easier and causes less damage to the horn material, both on the inside and outside of the hoof.

HYBRID

For riding horseshoes

Hybrid combines the benefits of various popular horseshoe nail models, so you only need one type. Hybrid is stronger than E and M, longer than ESL, and thinner than LX. Furthermore, there is extra pitch on both sides of the nail head for a perfect fit in the crease.

Also available in CU

CARRERA

For race plates

Carrera has the perfect fit for creases and nail holes in aluminium race plates. Choose from three lengths: Short – Medium – Long.

Also available in CU

HYBRID SECURE

For riding horseshoes

CARRERA SECURE

For race plates

The **'Secure'** nail head is wider and fills the crease more. This results in a larger bearing surface and slower nail wear, ensuring horseshoes stay securely in place longer. You will notice this especially on harder and sandy surfaces.

HARDTOP

Technology

The head and neck of the nail are hardened through precisely controlled heat treatment, allowing the nail to wear down flush with the shoe.

CU SHIELD

Technology

The steel nail is fully sealed with a layer of 100% red copper. This prevents rust and helps to keep the horn material stronger and healthier.

SELL BEYOND THE FORGE

Did you know part of this booklet is gold outside the forge too? Vets, horse owners, other players in the industry: same articles, a whole new audience. Why leave that market to someone else?

Look out for the “+” **symbol** next to certain articles. It marks the ones that are especially interesting for these alternative markets. And there’s another opportunity. Some products, like our hoof care range, are also worth stocking for the farrier themselves, to resell straight to the horse owner.

In short: this booklet isn’t just a product overview. It’s an invitation to broaden your horizon.

VETTEC

SIL-PAK - 210 CC

748-0001-094

- Silicone material for use under pad in order to cushion & protect the foot
- Liquid formula fills all void areas minimizing debris migration providing a clean sole & eliminating odors

VETTEC

SIL-PAK SOFT - 210 CC

748-0001-096

- 15 shore hardness
- Shock absorbing, protective, supportive
- Weight-bearing in 2 minutes

VETTEC

EQUI-PAK - 210 CC

748-0001-099

- Protect, cushion & support
- Great for a tilted coffin bone or laminitis
- Bonds to sole & frog

VETTEC

EQUI-PAK CS - 210 CC

748-0001-100

- Effectively deal with most cases of thrush
- Provides durable, shock absorbing support
- Use as a preventive measure before thrush even begins

VETTEC

EQUI-PAK SOFT - 210 CC

748-0001-101

- Extra soft padding material
- Very suitable for therapeutic use
- Developed for use under soles
- Hardness: 45 shore

VETTEC

SOLE GUARD - 210 CC

748-0001-102

- Fast, effective protection & support for the sound footed, unshod horse
- Provides protection & support for the bottom of the hoof in one easy application

VETTEC

EQUI-THANE SUPERFAST 210 CC

748-0002-088

- Ideal for foal extensions & making custom shoes
- Great for building heels, correcting heel angles & medial/lateral extensions
- Good for small hoof repairs

VETTEC

EQUI-THANE ADHERE - 210 CC

748-0002-089

- For small & large hoof repairs and for gluing on shoes
- Bonds to steel & aluminium
- Excellent for urethane glue-on shoes & boots
